REDUCTION

# Disposable Microfiber system

Hygiene and performance without compromise.

For years, Vileda Professional has set the standard in durable microfiber cleaning. This knowledge has now been transferred into the MicroOne™ range of single use microfiber pocket mops and wipes.

Nothing beats microfiber when it comes to hygienic cleaning!

All mops in the MicroOne™ range have a proven 99.99% bacteria reduction and are compliant with a wide range of cleaning solutions, including chlorine-based disinfectants. Within health care settings the single use concept reduces the risk of cross contamination dramatically as one mop is used per patient room and simply disposed of after use.

In sites without laundry, MicroOne™ is durable enough for a single days cleaning before being disposed of. No more issues of storing damp mops overnight.

40cm Pocket Mop

Available in 4 colors  
Blue, Red, Green, Yellow

# tem.

When top hygiene is paramount, nothing beats microfiber. MicroOne™ has the characteristics of Vileda Professional's top-class and respected cleaning products, which have helped creating hygienic environments for many years.

MicroOne™ is the best-in-class choice when you need a top hygiene cleaning result, and consider single-use products as the best option for your site.

### The hygiene hero

MicroOne™ has a proven performance of 99.9% bacteria reduction, and is compliant to chlorine-based disinfectant. In Health Care settings single-use products help reducing cross contamination.

### Easy and hygienic handling

MicroOne™ comes packed in handy plastic bags, for hygienic transportation and handling. Each wipe is Z-folded for easy removal even when wearing gloves. The bag fits perfectly in a 6-liter bucket and is easily re-sealed using the packaging label, for maximum hygiene. MicroOne™ concept is fully designed for the pre-prepared method, but is as well suitable for the bucket or spray method.

### Easy and effective pre-preparation

Pre-preparation is the method for reliable hygienic and ergonomic wiping. And the pre-preparation process is carried out fast and effectively.

### Simple preparation

- Place bag with 50 wipes in bucket
- Open the package and pour 500 mL (for cleaning) or 600 mL (for disinfection) of solution over the stack of wipes.
- After 15 minutes the liquid is evenly distributed within the stack of MicroOne™ wipes which are now ready to use.
- The clever plastic bag-in-bucket concept prevents that the bucket gets in touch with the moist wipes. No residues and soiling of the bucket mean no bacterial growth on the buckets inner surface.
- The lid of the bucket is easy to open and to close with one hand and prevents drying-out of wipes effectively.

### See for yourself!

Please follow this web address to see an animation of how to pre-prepare MicroOne™ wipes.
